

A Guide to Success: Review for Licensure in Physical Therapy

A Guide to Success consists of two major sections. The first section is an academic review that is organized into nine distinct units. The academic review provides candidates with valuable information that can enhance the effectiveness of study sessions. The second section is a compilation of four 200 question sample examinations designed to be reflective of the actual Licensing Examination. An elaborate answer key section provides a complete explanation and cited resource for each examination question. This innovative design allows candidates to remediate areas of weakness in a timely and efficient manner.
