

Diagnostic Cytopathology, 2e

Diagnostic Cytopathology provides the clinician with a comprehensive guide to the diagnostic applications of exfoliative and aspiration cytology. The book takes a systemic approach and will cover the recognised normal and abnormal cytological findings encountered in a particular organ. Appropriate histopathological correlations and a consideration of the possible differential diagnosis accompany the cytological findings. The book is heavily illustrated to ensure that it will be a practical resource for daily reference in the laboratory. A uniformity of basic chapter structure will expedite the clinicians search for answers to any query. in-depth bench book that covers everyday diagnostic work. Provides the clinician with an accessible guide to diagnostic investigation and screening. Cytologic findings closely related to histology. Provides the general diagnostic pathologist in the interpretation and recognition of tissue samples. Each chapter provides a summary of major diagnostic criteria and discusses the pitfalls and limitations of cytology. Enables the clinician to use cytology services more effectively. Major revisions of the following chapters: Mesotheliomas, Malignant Breast Tumours, Lymph Nodes, The Pathogenesis of Cervical Neoplasia, Cervical intraepithelial neoplasia and Squamous Carcinoma of the Cervix. Brand new chapter on Automation which is increasingly important in cervical screening. Additional material on Thin Core Biopsy technique which is increasingly used in Breast Screening Program. Inclusion of new genetic markers in immunohistochemistry increasingly important in non-gynaecological areas. With 47 additional contributors.
