

The Seventh Edition of this colorful, student-friendly LPN/LVN textbook has been thoroughly revised to provide even more of the knowledge and skills today's students need to provide safe and effective pediatric care. The text covers foundations and special concerns of pediatric nursing, age-specific developmental information, and clinically-focused coverage of common pediatric illnesses and disorders, organized by growth and development. An updated art program includes hundreds of photographs and illustrations. Workbook pages at the end of each chapter include NCLEX-PN style review questions, study activities, critical thinking questions, and dosage calculations. A bound-in CD-ROM includes Watch & Learn video clips and pediatric dosage calculation problems.

Bacteria and Complement (Current Topics in Microbiology and Immunology), American architect and architecture Volume 9, Mismanaged Care: How Corporate Medicine Jeopardizes Your Health, Borish's Clinical Refraction, 2e (Benjamin, Borish's Clinical Refraction), Galen on the Natural Faculties, Manual of Diagnostic Imaging: Clinicians Guide to Clinical Problem Solving (A Little, Brown spiral manual), Art Activities for Groups: Providing Therapy, Fun, and Function, Practical Statistics for Field Biology,
