Calpains, skeletal muscle function and exercise. - NCBI Calcium-regulated non-lysosomal thiol-protease which catalyzes limited proteolysis of substrates involved in cytoskeletal remodeling and signal transduction. **Calpain Activity Assay Kit (ab65308)** Abcam Apoptosis. 2010 Dec15(12):1480-93. doi: 10.1007/s10495-010-0526-4. Calpain and caspase processing of caspase-12 contribute to the ER stress-induced cell **Calpain-1 - Wikipedia** Calpain-1 is an enzyme. This enzyme catalyses the following chemical reaction. Broad endopeptidase specificity. This enzyme belongs to the peptidase family **Calpain Define Calpain at** In contrast, deletion of GPR68 or inhibition of calcium and calpain activation suppressed LEN-induced cytotoxicity. Moreover, expression of calpastatin (CAST), **CAPN1 Gene - GeneCards** **CAN1 Protein** **CAN1 Antibody** The family of calcium-activated neutral proteases, calpains, appears to play a key role in neuropathologic events following traumatic brain injury (TBI). Neuronal **Calpain - Wikipedia** Calpains have been implicated in basic cellular processes including cell Calpain cleaves many cytosolic proteins and therefore to be effective and limited in **Calpain as a therapeutic target in traumatic brain injury.** - NCBI - NIH Mol Cell Biol. 2002 Apr22(8):2716-27. Activation of m-calpain (calpain II) by epidermal growth factor is limited by protein kinase A phosphorylation of m-calpain. **CAPN2 - Calpain-2 catalytic subunit precursor - Homo sapiens** The calpain system originally comprised three molecules: two Ca²⁺-dependent proteases, mu-calpain and m-calpain, and a third polypeptide, calpastatin, **Calpains and muscular dystrophies.** - NCBI Calcium-regulated non-lysosomal thiol-protease which catalyzes limited proteolysis of substrates involved in cytoskeletal remodeling and signal transduction. **Calpain Inhibitors** **SCBT** Aug 16, 2011 Calpain is an intracellular Ca²⁺-dependent cysteine protease (EC 3.4.22.17 Clan CA, family C02). Recent expansion of sequence data across **Calpains An elaborate proteolytic system - ScienceDirect**

CaMPDB is a database on calpain, a calcium-dependent protease as well as one of the most typical enzymes of modulatory database mainly **Calpain and synaptic function.** - NCBI - NIH Calpain Activity Assay Kit (ab65308) provides optimized buffers and reagents for a convenient measurement of calpain activity. The Extraction Buffer provided **A calcium- and calpain-dependent pathway determines the** - Nature Aug 24, 2011 Both calpain I and calpain II are heterodimers composed of a large (80 kD) catalytic subunit and a small (30 kD) regulatory subunit (Fig 3). **The calpains: modular designs and functional diversity.** - NCBI - NIH Santa Cruz Biotechnology now offers a broad range of Calpain Inhibitors. Calpains are a family of cytosolic calcium-regulated cysteine proteases that functions **Role of calpain and cathepsin in apoptosis** - Abcam Proteolysis by calpain is a unique posttranslational modification that can change integrity, localization, and activity of endogenous proteins. Two ubiquitous **Role of calpain in skeletal-muscle protein degradation** - PNAS The latest Tweets from Calpain (@CalpainEqD). Admin on EqD and BCB, Former Parkinsons and Alzheimers Disease Researcher and now Teacher, Web **Massive expansion of the calpain gene family in unicellular eukaryotes** Sep 28, 2009 Skeletal muscle fibres contain ubiquitous (mu-calpain and m-calpain) and muscle-specific (calpain-3) Ca(2+)-dependent proteases. **Calpain and caspase processing of caspase-12 contribute to the ER** Calpains are a family of calcium-dependent cysteine proteases under complex cellular regulation. By making selective limited proteolytic cleavages, they **CaMPDB : Calpain for Modulatory Proteolysis** Non-caspase proteases such as calpains and cathepsins play an important role in cell death. Learn more about how to detect their activity. calpain function. Our data indicate that calpains play significant roles in L8 muscle-cell protein degradation and participate in the degradation of nebulin. **Activation of m-calpain (calpain II) by epidermal growth factor is** The calpain family is named for the calcium dependence of the papain-like, thiol protease activity of the well-studied ubiquitous vertebrate enzymes calpain-1 **The calpains in aging and aging-related diseases.** - NCBI - NIH Calpains are a ubiquitous, well-conserved family of calcium-dependent, cysteine proteases. Their function in muscle has received increased interest because of **The calpain system.** - NCBI Calpain activity regulates the turnover of integrin-linked focal adhesions, which controls cell adhesion to extracellular matrix substrates, cell migration across **CAPN1 - Calpain-1 catalytic subunit - Homo sapiens (Human)** Complete information for CAPN1 gene (Protein Coding), Calpain 1, including: function, proteins, disorders, pathways, orthologs, and expression. GeneCards **Role of calpain in skeletal-muscle protein degradation** - NCBI - NIH A calpain is a protein belonging to the family of calcium-dependent, non-lysosomal cysteine proteases (proteolytic enzymes) expressed ubiquitously in **Assaying calpain activity.** - NCBI Jun 8, 2017 The calpains, calcium-activated neutral proteases, are nonlysosomal, intracellular cysteine proteases. The mammalian calpains include **CAPN1 calpain 1 [(human)]** - NCBI Sep 29, 2012 Calpains are Ca²⁺-dependent cysteine proteases that participate in a range of crucial cellular processes. Dysfunction of these enzymes may **Calpain.** - NCBI News and Views. Nature Structural Biology 9, 239 - 241 (2002) doi:10.1038/nsb0402-239. How calpain is activated by calcium. Ahmad Khorchid & Mitsuhiro **How calpain is activated by calcium** - Nature Structural & Molecular
