

Maternity, Newborn, and Womens Health Nursing: Comprehensive Care Across the Life Span

This new book will be a core text for undergraduate Maternity/Newborn courses. It also will work for courses emphasizing Womens Health across the lifespan. Coverage includes core content on preconception, pregnancy, labor, birth, and postpartum. In addition, the text focuses on important topics throughout a womans life: health promotion, nutrition, medical issues, psychosocial issues, sexuality, family, fertility control and issues, menopause, and aging. While other texts touch on the different stages of a womans lifespan, this book provides more detail and information in areas outside the average maternity text.
