

## Codebusters Coding Connection: A Documentation Guide for Compliant Coding

CodeBusters Coding Connection is a first in coding publishing. Appropriate for physicians, medical students, and coders in all settings, it lists need-to-know diagnostic and procedural documentation tips never before compiled in a single publication. CodeBusters Coding Connection provides the key information that coders and physicians need for documentation to result in accurate and compliant coding. In a checklist format, the book shows the documentation that must be provided for proper code selection for dozens of diagrams and procedures. This pocket-sized quick reference comes at a time when compliance officers physicians, and coders heightened concern about audit liability is leading to an increased need for the best information available. CodeBusters Coding Connection makes an ideal training tool and assists compliance officers in demonstrating that their institutions are following OIG guidelines. Its small size, inviting format, easy-to-read content, and low price make CodeBusters Coding Connection an ideal publication for clinicians and coding/billing staff in all settings.
