

Inflammatory Bowel Disease: Pathophysiology, diagnosis and treatment of Crohns disease and ulcerative colitis

This guide is for all healthcare professionals, but aimed especially at nurses. The CD-ROM provides 300 images and illustrations, animations, sound recordings and video clips to create a multimedia reference that, with the accompanying hyperlinks and separate electronic glossary, makes for a fully interactive experience. The subjects covered include selected bowel disorders such as inflammatory bowel disease (Crohns disease, ulcerative colitis), intestinal infections, bowel cancer, intestinal polyps, diverticular disease, haemorrhoids, food allergy and irritable colon.
