

Hepatocellular Carcinoma: Diagnosis and Treatment, Second Edition (Current Clinical Oncology)

A fully synthesized practical approach to hepatocellular cancer (HCC) patient management by members of the university of Pittsburghs renowned Liver Cancer Center. Their presentation includes all the latest developments in the diagnosis and treatment of primary liver cancer. A summary chapter details for physicians the diagnostic and therapeutic decision making process for dealing with such problems as incidental tumors in the liver transplant, the role of neo-adjuvant chemotherapy, intra-arterial vs. intravenous therapy, the uses of embolization, and the significance of portal vein thrombus. Authoritative and highly practical, Hepatocellular Cancer: Diagnosis and Treatment captures for physicians the recent exciting changes that in our understanding, diagnostic methods, novel therapeutics, and day-to-day management of hepatocellular cancer.
