

Evidence-Based Pediatric Oncology (Evidence-Based Medicine)

Using the available systematic reviews and Standard Options Recommendations (SORs) which are evidence-based treatment recommendations, Evidence-based Pediatric Oncology is a ground breaking text on the management of childhood cancers. Covering all tumour types occurring in children and young adults, it provides systematic reviews with recommendations for optimum treatments for childhood cancer. Offering reviews and commentaries from leading internationally recognised paediatric oncologists, this fully revised second edition now covers significant randomised controlled trials.
