

Construction Project Administration (8th Edition)

For courses in Construction Management, Construction Contract Administration, and Construction Inspection. Drawing on the authors' extensive experience in construction engineering, administration, and education, this text/reference addresses each of the principal contract administration duties in logical order--from the hands-on viewpoint of a resident engineer on a construction project. It specifically addresses the responsibility and authority of the Resident Project Representative, unlike other texts which focus on the project manager. The text takes a project team approach for improved job efficiency, outlining a construction team operation in which the administrator delegates to the greatest possible extent all those contract administration functions that can be more effectively done in the field.
