

Three lectures on experimental embryology

Excerpt from Three Lectures on Experimental Embryology: With a Biographical Note
The manuscript of these lectures was found amongst my husbands papers. He had, I know, intended to publish them, but had laid them aside to await final revision before going to press. In these circumstances the best course seemed to be to publish the text exactly as he had left it, while adding a few illustrations to take the place of the lantern slides used at the lectures when these were delivered at University College, London. I am glad to have the opportunity of acknowledging here my deep indebtedness to all who have so kindly helped me in seeing this book through the Press. My thanks are especially due to Miss Kirkaldy, to Mrs. Cuthbert Baines, to Dr. Marett, to Professor Ramsay Wright, and to the Delegates of the University Press, who one and all by their valuable help and kindly sympathy have made it possible for me to carry out one of my husbands last wishes. About the Publisher
Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com
This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
