

This book provides a multi-disciplinary framework for developing and analyzing health sector reforms, based on the authors extensive international experience. It offers practical guidance - useful to policymakers, consultants, academics, and students alike - and stresses the need to take account of each countrys economic, administrative, and political circumstances. The authors explain how to design effective government interventions in five areas - financing, payment, organization, regulation, and behavior - to improve the performance and equity of health systems around the world.

Damaged Care - A Surgeon Dissects the Vaunted Canadian and U.S. Health Care Systems, Therapeutic Considerations for the Elderly (Clinics in Physical Therapy), Clinical Simulations in Respiratory Care (CD-ROM, Student Version) with Book, Practice Under Pressure: Primary Care Physicians and Their Medicine in the Twenty-first Century (Critical Issues in Health and Medicine), Art Nouveau, The New York Times: Travelers Guide to Art Museum Exhibitions 2003, Purinergic Regulation of Respiratory Diseases (Subcellular Biochemistry),
