

## Success for the New Chiropractor

Finally a text that every chiropractic student and graduate has wanted and needed. This is the perfect resource to assist in the vital choices regarding the business aspects of a newer chiropractors career. This book covers most, if not all of the questions that a student or new graduate may have when they are pondering how to take the next step: not just learning how to be a doctor, but actually turning that knowledge into an occupation. From the realities of successfully handling student loans to the hurdles in starting a practice, this resource answers the questions we have all encountered. This book is a must read for all students and recent graduates. Rated a 10 out of 10 by the reviews at Dynamic Chiropractic. This book's 15 chapters include information on evaluating practice options, practice classifications, the ins and out of associating, purchasing and starting up a practice. Other concerns extensively discussed are location evaluation, the chiropractic marketing idea, common and alternative chiropractic advertising, generating referrals, opening a practice for only \$500 and much more.
