

Formula Handbook for Environmental Engineers and Scientists

Because your success begins with the right formula . Finding the right formula is an essential part of environmental engineering and research. However, consulting the literature of the many disciplines that affect your work can be a time-consuming, inefficient, and often difficult process. Not any more! The Formula Handbook brings together in a single volume the most popular and useful formulas covering biological/biochemical processes in natural and engineered systems--saving hours of valuable research time. Compiled from select journals, review articles, and books, the Formula Handbook is an indispensable one-stop reference for todays busy environmental engineer or scientist. The Handbook is arranged alphabetically, making information easy to find. In addition to the formulas themselves, entries include: * An introduction to the topic * Definition of terms * Numerical values * Tables and figures * References
