

# Introducing Medicines Management

Medicine administration is a fundamental aspect of the nursing role, carrying with it great risk, and requiring a high level of skill and background knowledge. This student friendly text will take you through the basic concepts of medicines management, to the essential skills needed in practice. Introducing Medicines Management provides an awareness of the inter-relationship between the patient, the medicine and the prescription as a fundamental systems approach, and will help you to understand how this is related to medicines management.
