

The West, Islam and Islamism: Is Ideological Islam Compatible with Liberal Democracy?

The aim of this book is to encourage mutual understanding between the Islamic and Western worlds. The majority of Muslims are peaceable, law-abiding citizens. However, Muslim fundamentalists, described here as Islamists, present a challenge to the values of Western democracies. With many lapses, modern Western societies strive to uphold values such as tolerance, pluralism and individual freedom. Islamism is monolithic, intolerant of dissent and hostile to individual liberty. Islamic societies and militant Islamism need to be distinguished. Islamism is not compatible with liberal democracy, but it is the hope and intention of the authors that through this book non-Muslims may develop a better understanding of Islam and better relationships with moderate, peaceable Muslims. Since the first edition of this book was published there have been several serious manifestations of Islamist extremism, including bomb attacks on London in July 2005 and the storm of protest surrounding the Danish cartoons. This second edition considers these worrying developments, and examines the way in which extremists have been able to organise campaigns of terrorism from a relatively secure position in Britain. The authors ask to what extent a free and tolerant society can accommodate those who would use its freedoms to destroy it. It is organised terrorism that claims most public attention. But there is substantial evidence of a concerted and co-ordinated strategic attack over a long period on the fundamental principles of Western society.
