

This handy book provides brief descriptions of clinically important drug interactions selected from the authoritative looseleaf reference, Drug Interactions Analysis and Management. Only level 1 and 2 interactions and those level 3 interactions most likely to affect patient outcomes are included. The information is compiled from up-to-date biomedical studies and case reports and presented in a quick-reference format. For each interaction, the authors provide a clinical significance rating and information on risk factors, similar drugs that might also interact, and patient management. The book is indexed by generic drug names, with selected trade names cross-referenced to generic equivalents.

Study Guide to Accompany Maternal and Child Health Nursing: Care of the Childbearing and Childrearing Family 6th (sixth) edition, Desert Landscape Architecture [Hardcover] [1998] (Author) John C. Krieg, Law and Professional Issues in Nursing (Transforming Nursing Practice Series), Infection Control for Advanced Practice Professionals, Mark #41: Another Architecture: Issue 41, Physiology in Childbearing: With Anatomy and Related Biosciences, The Frightened Land: Land, Landscape and Politics in South Africa in the Twentieth Century, Child Development, Second Edition: A Practitioners Guide (Social Work Practice with Children and Families), Safe Medical Devices for Children,
