

Faith vs. Science - The Unnecessary Dichotomy

This is not a book on theology, nor is it a highly technical scientific analysis. Its really just a conversation between me and a hypothetical, non-hostile unbeliever. My purpose is to help scientific people see that religion is not just for kooks and to help religious people see that science is not just for atheists. Persons skilled in debate will quickly notice that I have utilized a variety of methods to advance my arguments such as logic, rhetoric, presentation of scientific/experimental data, and even narrative. I realize this mixture of methods is in itself a fault and sometimes appears self-contradictory. However, keep in mind that this book is written in a conversational tone. In real life conversations, people utilize a variety of methods to make their points. That's what I'm doing here opening up a reasonable, educated conversation about God, science, and life itself in ways that work best for me.

____ About the Author - JEROME GODDARD is an Associate Extension Professor of Medical and Veterinary Entomology at Mississippi State University and is also an Affiliate Professor of Medicine at the University of Mississippi Medical Center in Jackson, MS. He has written over 180 scientific papers and 11 books, some of which have won international awards. Dr. Goddard lives in Starkville, Mississippi with his wife, Rosella.
