

DENIALS

DENIALS Juli Woodson, a health insurance claims auditor in her early forties, is a successful business woman in Austin, Texas. Her client-hospitals love her; dozens of health insurance companies/HMOs hate her. Synopsis Based upon the real life experiences of a health insurance claims auditor, **DENIALS** follows the money. Among other things, Juli Woodson discovers that the enormous profits made by the health insurance companies/HMOs, along with the ability to pay their top executives disproportionately high salaries is in large part a result of money gained from the improper denial and/or under-payment of claims to hospitals, doctors and often times even patients. Julis slogan: Follow the contract/ policy and youll find the crime! **DENIALS** is written as fiction. However, without naming names or actual corporations, **DENIALS** tells the factual story of how billions of dollars are being siphoned from hospitals, doctors and patients money contractually owed to them by health insurance/HMO corporations. **DENIALS** may not be as scandalous as some probable forthcoming ENRON epic. It may not even be as dramatic as a sexy female law clerk/secretary discovering how a small town in southern California has its water supply polluted by an electrical power company. But then again since **DENIALS** involves more misplaced money than both of the aforementioned stories combined it might just be as dramatic and scandalous. P.S. In case you wondered Thats billions each year; year in year out ! I was one of the founders and first president of the corporation responsible for working with hospitals in central TX and recovering tens of millions of dollars from health insurance companies for and on behalf of hospitals and physicians.
