

Case Studies in Nursing Case Management

Case Studies in Nursing Case Management provides portrayals of health care organizations around the nation that have successfully implemented case management programs. It reports on how case management is being used in inpatient, ambulatory, operating room, intensive care, home health, and subacute settings. Specific populations such as pediatric, maternity, dialysis, geriatric, psychiatric, and AIDS/HIV patients are also addressed. Case managers roles in managed care and community-based settings as well as in insurance companies are described.
