

Radiographic Positioning and Related Anatomy: Workbook and Laboratory Manual

This workbook is designed to teach student radiographers positioning, special procedures and related anatomical structures and is intended to accompany the textbook of the same title (0-8151-0947-4). All the basic or routine projects and/or positions for all body parts and systems are covered in the workbook, as well as some of the more common optional projections and/or procedures. The answers to the self-tests found in each chapter are placed at the back of the book.
