

Student Mastery Manual to accompany Clinical Procedures for Medical Assistants, 5e

This text describes the clinical skills and laboratory procedures used in the medical office. It presents step-by-step directions, with rationales, of various procedures, including: the checking of vital signs; the administration of medication; collection of specimens; emergency procedures; and tests for allergies, pregnancy and mononucleosis. The text also reviews: the use of new instruments such the tympanic thermometer; new systems such as the Tubex Injection System and the Unopette System for white blood cells; and the latest guidelines for mammograms and paediatric immunization. The text also includes a patient education section to facilitate the conveyance of important information to the ill or injured. Finally, guidelines of the OSHA and CLIA are provided. An instructors manual (W5414-2) is available for #9.50 and a student manual (W5337-5) is #13.00.
