

Scope

This award-winning program was designed to teach all EMS providers how to care for children with special health care needs. There are 12 million children in the United States with special health care needs. These children often have uncommon medical conditions that are unfamiliar to prehospital providers. SCOPE is designed to improve the prehospital providers knowledge and comfort level when encountering children with special health care needs. SCOPE provides basic information on various chronic medical conditions that these children may have, as well as the technologies and equipment that may be necessary for their survival.
