

Simadvisor

SimAdvisers content is designed to align with simulations made by Laerdal, the market leading name in simulators and simulation products. This connection will ensure productive clinical simulations that will help students be prepared for their futures as practicing nurses. SimAdviser provides students with in-depth simulation preparation modules to help prepare for clinical simulations in the classroom. Providing access to information systems used in hospitals nationwide to guide nurses in their patient intervention, SimAdviser prepares students with real world experience. Preparation materials include access to customized, curriculum-specific content from Lippincotts Nursing Advisor (LNA) and Lippincotts Nursing Procedures and Skills (LNPS), including images, videos and charts. SimAdviser also has integrated textbook content from Brunner and Suddarths Textbook of Canadian Medical-Surgical Nursing, Second Edition, making the connection to the classroom even easier. All SimAdviser content is available in one place, so students spend less time searching for content and more time studying. Each scenario module houses content that is chosen specifically to support students for simulations used in class.
