

Rigorously updated for 2005, ADI contains more than 22,000 entries and retains its reputation as the most complete and current listing of drugs and drug products available in a single source. Practical features include: alphabetically listed drug names, extensive cross-indexing, phonetic pronunciations, and complete information on the distributors brand name, manufacturer, generic and/or chemical names, composition and strength, pharmaceutical forms available, package size, use, common abbreviations, and a listing of orphan drugs. The electronic version contains an audio pronunciation feature and color photographs of more than 900 pills.
