

## Taro Ashihara: Program and Style (Talenti)

Taro Ashihara belongs to the last generation of Japanese architects who grew up in the climate of the second half of the XXth century, and in a certain way he is the most emblematic example. His work reveals a probing attention to the new technologies, but at the same time they organize a subtle spatial system that takes into account the feelings and aspirations of the people who live there and establishes a privileged relationship with the natural environment.
