

Discusses current applications of optical phenomena, including the optical foundations of lasers, spectacles, IOLs and refractive surgery. Presents optics of the human eye; basic concepts of geometric optics; ophthalmic instruments and contact lenses. Discusses vision rehabilitation from the epidemiology of vision impairment, classification of visual function deficits, patient assessment and low vision management. Up to 15 AMA PRA Category 1 Credits (TM). Last major revision 2009-2010.
