

Nowhere has the relationship between state and church been more volatile in recent decades than in Latin America. Anthony Gills controversial book not only explains why Catholic leaders in some countries came to oppose dictatorial rule but, equally important, why many did not. Using historical and statistical evidence from twelve countries, Gill for the first time uncovers the causal connection between religious competition and the rise of progressive Catholicism. In places where evangelical Protestantism and spiritist sects made inroads among poor Catholics, Church leaders championed the rights of the poor and turned against authoritarian regimes to retain parishioners. Where competition was minimal, bishops maintained good relations with military rulers. Applying economic reasoning to an entirely new setting, *Rendering unto Caesar* offers a new theory of religious competition that dramatically revises our understanding of church-state relations.
