

## The Counterpunching Minister (who couldnt be preyed away)

The Counterpunching Minister (who couldnt be preyed away) is a collection of 64 Counterpunch articles, calling for religious leaders to regain their prophetic role of confronting political power and wealth with reality and moral truth, rather than serving as chaplains of the status quo and providing the Invocations and Benedictions for those in power. The articles deal with Americas moral decay. The refusal of our government to engage in national self-examination after the horrific 9/11 attacks. Instead, starting a so-called global war on terrorism in the continuing pursuit of world domination under the pretext of protecting our national security. Launching illegal, pre-emptive falsely based wars of choice against Afghanistan and Iraq, resulting in the deaths, dislocation and diminishing of millions of people. Violating the national sovereignty of other countries with weaponized drones, filling their skies with dread, and bringing sudden death and injury to innocent children, women and men. Creating endless enemies that fuels an unending war on terror which benefits the political/corporate/energy/ intelligence complex. Essays focus on the pervasive militarization of America, aided by mainstream media which serve as guardians of the status quo. A militarization that has accommodated the governments criminal wars, the brutal Guantanamo Bay detention center, a presidential kill list that denies due process even to Americans, the National Security Agency spying on all of us citizens, and the prosecution and pursuit of whistleblowers like Pvt. Chelsea Manning and Edward Snowden. Articles also spotlight the ever widening economic gap between the politically influential wealthy and the 99%.

With the countrys white-controlled hierarchy of access to political, economic and legal power reinforcing Americas historic racial dividewith the current black president an accommodating exception to

the ruling elite. Certain pieces address the use of God to sancti-tize the moral decay. Such as belief in American exceptionalism and Christocentricism and God bless America-- the latter presidential code words for the imperialistic ways of Providence. For many, the God of our Fathers, is American, white, Christian, imperialistic, heterosexual, male. The writings confront a major issue of religion: the aversion of many people of faith to politics and conflict. Speaking truth to political and corporate power creates controversy and carries the risk of losing their own institutions privileged status and the financial support of disaffected members. It is much easier and safer to be a shepherd than a prophet, and to see people as sheep rather than as individuals with human rights. The book is about empathy. Inclusive empathetic moral caring for other persons-- near and far-- depends on the humanness of those who represent and serve people and the common good whether clergy and their congregations, health care professionals, social service and civic leaders, educators, politicians, or citizen volunteers. Included in this collection is an article on the writers own successful lawsuit against an abusive denominational hierarchy that violated his right of privacy in an attempt to assassinate his character and end his ministry. The writers case provides a landmark ruling that protects clergy and other workers and whistleblowers-- who refuse to allow those with authority over them to control their conscience and set limits on their empathy and political involvement.
